EDUCATION

- **National Institute of Technology (NIT) Patna** — *2023 – 2027 (Expected)*
  B.Tech, Electronics and Communication *Engineering* — *cgpa-8.72*
- **Sri Chaitanya Junior College,Vijayawada** — **2021-2023**
  Board of Intermediate Education, Andhra Pradesh — cgpa-9.8
- **Blooms High School,Vinukonda** — **2021**
  Board of Secondary Education, Andhra Pradesh — cgpa-9.93

SKILLS

- **Programming:** Python, SQL, **C**, Java, Javascript
- **Data Analysis:** EDA, Data Cleaning, Data Transformation, Feature Engineering
- **Visualization:** Power BI (DAX), Excel, Matplotlib, Seaborn
- **Libraries&Tools:** Pandas, NumPy, MLxtend (Apriori),Git,Github
- **Relevant Coursework:** Data Science, Probability & Statistics,Database Management Systems
- **Web Development:** HTML,CSS,React.js,Node.js,Express.js,MongoDB

PROJECTS

- **Instacart Data Analysis & Reorder Prediction System | GitHub**
  Personal project
  - Analyzed over **3 million grocery orders** from **200,000+ users** to uncover purchase patterns, reorder trends, and demand cycles using **Python**, **Pandas**, and **Matplotlib**.
  - Performed Market Basket Analysis using the **Apriori algorithm** and identified **28 high-lift product pairs** for cross-selling.
  - Engineered **30+ features** across user, product, aisle, and department levels; built an **XGBoost** model with cost-sensitive learning and evaluated performance with **ROC-AUC**.
  - Optimized memory usage by **50%** with dtype downcasting and applied **MinMax Scaling** for efficient large-scale model training.
- **Business Intelligence Project – Myntra Sales Analysis | GitHub**
  Personal project
  - Built an interactive **Power BI dashboard** analyzing **3,500+ orders** across 40 products in 4 categories; implemented **DAX-driven KPIs** for sales and discount analysis.
  - Discovered key insights: women's category surpassed men's (2022), Friday drove peak sales, and **Bengaluru & Ahmedabad** led regional demand; guided **data-driven marketing strategies** and **inventory planning**.
  - Delivered a stakeholder-ready report featuring slicers, geo-map analysis, and visual highlights of the **29% Q1–Q2 men's sales drop** and discount trends in women's jeans.
- **Building a Stock Trading Platform | GitHub**
  Personal project
  - Developed a full-stack stock trading platform for viewing a real time stock prices and performing simulated buy/sell operations.
  - Implemented RESTAPIS and websocket integration to fetch and update live time market data,achieving smooth real-time updates.
  - Created a secure USER AUTHENTICATION SYTEM (JWT) ensuring safe login and protected routes. Applied portfolio management logic to caluculate holdings, profit/loss, and transaction history,improving user insights.

Certifications

- **Hacker rank SQL skill Certification(June 2026)**
- **Kaggle Data visualization Certification(June 2026)**
- **Data Base Management System -Udemy(May 2026)**

EXTRACURRICULAR

- Actively participated in sports activities including **Badminton and Basketball**.
