EDUCATION

National Institute of Technology, Patna **2023 - 2027**
Bachelor of Technology, Electronics and Communication Engineering (GPA: 8.63) *Patna*

Sri Chaitanya Junior College, Vijayawada **2021 - 2023**
Senior Secondary (GPA: 98) *Vijayawada*

Blooms High School, Vinukonda **2021**
Secondary (GPA: 99.3) *Vinukonda*

EXPERIENCE

Co[€] | *NPTEL Winter Internship - Vinternship by VLED Lab* **Jan 2026 - Apr 2026**

- Led full-stack development training sessions on the MERN stack under Prof. Sudarshan Iyengar at VLED Lab
- Completed structured training in TypeScript, React, Express.js, Node.js, and MongoDB, and developed RESTful APIs
- Collaborated with multidisciplinary teams to develop real-time full-stack applications, leveraging frontend frameworks and backend integration
- Designed and implemented APIs and managed database connectivity with MongoDB and PostgreSQL
- Built mini-projects following industry-style coding practices and version control using GitHub

PROJECTS

Building a Stock Trading Platform **Aug 2025 - Nov 2025**

- Developed a full-stack stock trading platform using React, Node.js, and PostgreSQL for viewing real-time stock prices and performing simulated buy/sell operations
- Implemented REST APIs with Express.js and integrated WebSockets to fetch and update live market data, ensuring smooth real-time updates
- Created a secure user authentication system (JWT) ensuring safe login and protected routes.
- Applied portfolio management logic to calculate holdings, profit/loss, and transaction history, improving user insights.

Instacart Data Analysis and Reorder Prediction System **May 2025**

- Analyzed over 3 million grocery orders from 200,000+ users to uncover purchase patterns, reorder trends, and demand cycles using Python, Pandas, and Matplotlib.
- Performed Market Basket Analysis using the Apriori algorithm and identified 28 high-lift product pairs for cross-selling.
- Engineered 30+ features across user, product, aisle, and department levels; built an XGBoost model with cost-sensitive learning and evaluated performance with ROC-AUC.
- Optimized memory usage by 50 percentage with dtype downcasting and applied MinMax Scaling for efficient large-scale model training.

SKILLS

- **Programming Languages:** C, Java, Python, JavaScript
- **Frameworks & Libraries:** HTML, CSS, React, Node.Js, Pandas, Numpy, Matplotlib, MLxtend(Apriori)
- **Tools & Technologies:** SQL, PostgreSQL, Excel, VS code, GitHub, Jupyter NoteBook

CERTIFICATIONS

- Apna college: Alpha(DSA with Java) (www.Certification.com) March 2025
- Forage: Cyber Job Simulation Oct 2025
